A Software Developer experienced in developing web as well as mobile apps. Creates multiple highly scalable applications using different tech stacks. Proficient at understanding the requirements even of the most demanding client and delivers the project even before the deadline.

LD/IT

Professional experience

Assignments

2019 04 – Present   **AXA SSC PHILIPPINES (VISEO)**
                           Sr. Full Stack Developer

Projects:

E-commerce - Delivered e-commerce sites for multiple line of businesses for an insurance company in the Philippines. The site was created through an in-house framework which can be integrated with different backend platforms. The front-end was made to be mobile friendly and should be adaptive to the device the customer is using.

Link - https://www.axa.com.ph/travel-insurance/

ChatBot SDK - Delivered chatbots to insurance companies in the Philippines and HK. The bots were used to chat with customers about their policies and investments, and they even give wellness tips to relieve stress of the customers. The bot supports Chinese and English language and continuously learns through its interaction with customers everyday.

Degree:	Bachelors of Science in Information Technology
School/University:	STI Colleges - Tagbilaran
Graduated in:	2014

Languages

English

LD/IT

Personal

Aside being a software developer I do love work life balance. In my past time, I do watch tv series (Marvel, DC, Blacklist, How to get away with murder and the list goes on). In my experience being in different teams I am flexible with my working environment. I do have a passion in learning exploring new frameworks and different innovative technology that is disrupting.
